From the Health Services Office

Welcome to Moore College of Art & Design. I am Diane Azuma, the Director of Health Services. Health Services is located on the first floor of Stahl Hall. I am here during the fall and spring semesters to meet students’ routine health care needs and to handle emergencies. My hours are Monday through Friday from 9a.m. - 3p.m.

In addition, the College refers students to area physician practices (please see below for further information). Office visits and diagnostic tests are billed to the students’ insurance. If a student needs a specialist, I can also handle some referrals. In addition to this coverage for your physical needs, we have in Student Services a wonderful College Counselor, Ruth Gayle, M.Ed., who has been working with artists here at Moore for over 15 years and who is well respected by students, faculty and staff.

The College requires that students have health insurance. Many of our students are already insured under their family’s health insurance plan. Those students will need to submit documentation of coverage. All others must purchase the school’s health insurance. Further details can be found in the following section.

I am enclosing a health form; it is the student's responsibility to have this form completed, signed by their physician, and returned to the Health Services Office. This form is kept in a confidential file in Health Services so that I can better serve your needs.

The health form, including a copy front and back of your health insurance card and immunization record signed by your physician, must be completed and returned to the school by the start of classes. A completed health form is required for both commuters and residents. Residents without completed health forms may not move into housing. To assist in making your transition to college smoother, we have some suggestions for you. Plan ahead! At this time of the year, it is difficult to get a timely appointment with your physician due to the increased demand of students needing physicals for school. Secondly, know what your health insurance is, have the card with you, and find out how to use it. Thirdly, if you are being treated for any long term medical or psychological conditions and you will be far away from home, we suggest that you discuss with your physician and/or therapist about making connections to physicians or therapists near school to ensure continuity of care while you are at school.

If you do not have a physician to complete this form, you may make an appointment at the following offices. You should make this appointment prior to the deadline for return of the health form. There is a fee for this visit in addition to the charge for vaccinations or laboratory work you may require. All charges for this appointment are the responsibility of the student. Please verify if your present health insurance is accepted at these offices. You must bring previous vaccination records.

Drexel Family Medicine @ Center City - Dr. Annette Gadegbeku
219 N. Broad St. 6th Floor Philadelphia, PA 19107 Tel # 215-482-1234

PENN CARE @ Rittenhouse- Dr. Elizaveta Tikhonova
1840 South St. Philadelphia, PA 19146 Tel # 215-893-6200

Because the College must have your health form to properly address your medical needs, failure to return a completed health form by September 12, 2013 will result in a $100 penalty, and a hold will be placed on your student account.

I am pleased to say that the College is well equipped to meet your health needs. There are no long waits or anonymity often associated with university health services. I welcome you as an incoming student, and I look forward to helping you stay healthy while you pursue your education as an artist.

Diane Azuma, RN | Director of Student Health Services

PARENTAL PERMIT

The Law requires that parental permission be obtained for procedures on minors. The following consent form should be signed by the parents so that such procedures may be promptly carried out with no unnecessary delays. However, no major operation will be performed, except in extreme emergency, without parents being contacted and fully informed. I give permission for such diagnostic and therapeutic procedure as may be deemed necessary for my daughter and also to present information concerning her medical condition to other responsible college officials when deemed desirable.

Part II – TO BE COMPLETED AND SIGNED BY YOUR HEALTH CARE PROVIDER. All information must be in English.

Height: ___________ Weight: ___________

A.    M.M.R. (Measles, Mumps, Rubella) (Two doses required at least 28 days apart for students born after 1956.)

1. Dose 1 given at age 12 months or later ………………………………………………………………………. #1 ___/___

2. Dose 2 given at least 28 days after first dose ………………………………………………………………………. #2 ___/___

B.   Polio (Primary series, doses at least 28 days apart. Three primary series are acceptable. Refer to ACIP website for details.)

1. OPV alone (oral Sabin three doses): ……………..#1 ___/___ #2 ___/___ #3 ___/___

2. IPV/OPV sequential: ……………………..IPV #1 ___/___ IPV #2 ___/___ OPV #3 ___/___ OPV #4 ___/___

3. IPV alone (injected Salk four doses): …………#1 ___/___ #2 ___/___ #3 ___/___ #4 ___/___

C.  Varicella (Birth in the US before 1980, a history of chicken pox, a positive varicella antibody, or two doses of vaccine meets the requirement)

1. History of Disease      Yes _______     No _______    or Birth is US before 1980         Yes _______ No _______

2. Varicella antibody       ____/____          Result: Reactive_______         Non – reactive_________

3. Immunization

a. Dose #1 …………………………………………………………………………………………………………………. #1 ___/___

b. Dose #2, given at least 12 weeks after first dose 1-12 years and at least 4 weeks after the first dose if age 13 years or older…………………….……#2 ___/___

D.   Tetanus-Diphtheria-Pertussis

1. Primary series completed?     Yes ____      No ____

Date of last dose in series: ___/___/___

2. Date of most recent booster dose:  ____/____ /____

Type of Booster:     Td _____     Tdap _____

Td booster recommended for ages 11-64 unless contraindicated.

* Students must have proof of Tdap (Tetanus, Diphtheria and Pertussis vaccine) immunization.

Students with Td (Tetanus, Diphtheria) only will not be considered compliant.

## K. TUBERCULOSIS (TB) SCREENING/TESTING

Please answer the following questions:

- Have you ever had close contact with persons known or suspected to have active TB disease? [ ] Yes [ ] No

- Were you born in one of the countries listed below that have a high incidence of active TB disease? [ ] Yes [ ] No

  (If yes, please CIRCLE the country, below)

  - Afghanistan
  - Dominican Republic
  - Malawi
  - Seychelles
  - Algeria
  - Ecuador
  - Malaysia
  - Sierra Leone
  - Angola
  - El Salvador
  - Maldives
  - Singapore
  - Argentina
  - Equatorial Guinea
  - Mali
  - Solomon Islands
  - Armenia
  - Eritrea
  - Marshall Islands
  - Somalia
  - Azerbaijan
  - Estonia
  - Mauritania
  - South Africa
  - Bahrain
  - Ethiopia
  - Mauritius
  - Sri Lanka
  - Bangladesh
  - Fiji
  - Micronesia (Federated States of)
  - Sudan
  - Belarus
  - Gabon
  - Mongolia
  - Suriname
  - Belize
  - Gambia
  - Morocco
  - Swaziland
  - Benin
  - Georgia
  - Mozambique
  - Syrian Arab Republic
  - Bhutan
  - Ghana
  - Myanmar
  - Tajikistan
  - Bolivia (Plurinational State of)
  - Guam
  - Namibia
  - Thailand
  - Bosnia and Herzegovina
  - Guatemala
  - Nepal
  - The former Yugoslavia
  - Botswana
  - Guinea
  - Nicaragua
  - Brazil
  - Guinea-Bissau
  - Niger

  - Chad
  - Kenya
  - Poland
  - Tanzania
  - China
  - Kiribati
  - Portugal
  - Uruguay
  - Colombia
  - Kuwait
  - Qatar
  - Uzbekistan
  - Comoros
  - Kyrgyzstan
  - Republic of Korea
  - Vanuatu
  - Congo
  - Lao People's Democratic Republic
  - Republic of Moldova
  - Venezuela (Bolivarian Republic)
  - Côte d'Ivoire
  - Republic
  - Romania
  - Russia
  - Viet Nam
  - Croatia
  - Latvia
  - Russian Federation
  - Democratic People's Republic of Korea
  - Lesotho
  - Rwanda
  - Yemen
  - Democratic Republic of the Congo
  - Libyan Arab Jamahiriya
  - Saint Vincent and the Grenadines
  - Zambia
  - Djibouti
  - Lithuania
  - Sao Tome and Principe
  - Zimbabwe
  - Madagascar
  - Senegal

Source: World Health Organization Global Health Observatory, Tuberculosis Incidence 2010. Countries with incidence rates of >20 cases per 100,000 population. For future updates, refer to [http://apps.who.int/ghodata](http://apps.who.int/ghodata)

- Have you had frequent or prolonged visits* to one or more of the countries listed above with a high prevalence of TB disease? [ ] Yes [ ] No

  (If yes, CHECK the countries, above)

- Have you been a resident and/or employee of high-risk congregate settings (e.g., correctional facilities, long-term care facilities, and homeless shelters)? [ ] Yes [ ] No

- Have you been a volunteer or health-care worker who served clients who are at increased risk for active TB disease? [ ] Yes [ ] No

- Have you ever been a member of any of the following groups that may have an increased incidence of latent *M. tuberculosis* infection or active TB disease — medically underserved, low-income, or abusing drugs or alcohol? [ ] Yes [ ] No

**If the answer is YES to any of the above questions**, Moore College of Art & Design requires that you receive TB testing as soon as possible but at least prior to the start of the subsequent semester.

**If the answer to all of the above questions is NO**, no further testing or further action is required.

* *The significance of the travel exposure should be discussed with a health care provider and evaluated.*
Immunization Record

Last Name ______________________________ First Name ______________________ DOB __________________

TUBERCULOSIS (TB) RISK ASSESSMENT (to be completed by health care provider) Clinicians should review and verify the information above. Persons answering YES to any of the questions in Part K are candidates for either Mantoux tuberculin skin test (TST) or Interferon Gamma Release Assay (IGRA), unless a previous positive test has been documented.

History of a positive TB skin test or IGRA blood test? (If yes, document below) Yes _____ No _____

History of BCG vaccination? (If yes, consider IGRA if possible.) Yes _____ No _____

1. TB Symptom Check

Does the student have signs or symptoms of active pulmonary tuberculosis disease? Yes _____ No _____

If No, proceed to 2 or 3

If yes, check below:

☐ Cough (especially if lasting for 3 weeks or longer) with or without sputum production
☐ Coughing up blood (hemoptysis)
☐ Chest pain
☐ Loss of appetite
☐ Unexplained weight loss
☐ Night sweats
☐ Fever

Proceed with additional evaluation to exclude active tuberculosis disease including tuberculin skin testing, chest x-ray, and sputum evaluation as indicated.

2. Tuberculin Skin Test (TST)

(TST result should be recorded as actual millimeters (mm) of induration, transverse diameter; if no induration, write “0”. The TST interpretation should be based on mm of induration as well as risk factors.)

Date Given: _____/_____/_____   Date Read: _____/_____/_____  
M      D       Y             M      D       Y
Result: ________ mm of induration   **Interpretation:   positive____ negative____

Date Given: _____/_____/_____   Date Read: _____/_____/_____  
M      D       Y             M      D       Y
Result: ________ mm of induration   **Interpretation:   positive____ negative____

**Interpretation guidelines

An induration of 5 or more millimeters is positive:

☐ Recent close contacts of an individual with infectious TB
☐ persons with fibrotic changes on a prior chest x-ray, consistent with past TB disease
☐ organ transplant recipients and other immunosuppressed persons (including receiving equivalent of >15 mg/d of prednisone for >1 mo.)
☐ HIV-infected persons

An induration of 10 or more millimeters is positive:

☐ recent arrivals to the U.S. (<5 years) from high prevalence areas or who resided in one for a significant* amount of time
☐ injection drug users
☐ mycobacteriology laboratory personnel
☐ residents, employees, or volunteers in high-risk congregate settings
☐ persons with medical conditions that increase the risk of progression to TB disease including silicosis, diabetes mellitus, chronic renal failure, certain types of cancer (leukemias and lymphomas, cancers of the head, neck, or lung), gastrectomy or jejunoileal bypass and weight loss of at least 10% below ideal body weight.

An induration of 15 or more millimeters is positive:

☐ persons with no known risk factors for TB who, except for certain testing programs required by law or regulation, would otherwise not be tested.

* The significance of the travel exposure should be discussed with a health care provider and evaluated.

3. Interferon Gamma Release Assay (IGRA)

Date Obtained: _____/_____/_____ (specify method)   QFT-GIT   T-Spot   other_____
M      D       Y
Result: negative____ positive____ indeterminate____ borderline____ (T-Spot only)

Date Obtained: _____/_____/_____ (specify method)   QFT-GIT   T-Spot other_____
M      D       Y
Result: negative____ positive____ indeterminate____ borderline____ (T-Spot only)

4. Chest x-ray: (Required if TST or IGRA is positive)

Date of chest x-ray: _____/_____/_____  Result: normal____ abnormal_____  
M      D       Y
Management of Positive TST or IGRA

All students with a positive TST or IGRA with no signs of active disease on chest x-ray should receive a recommendation to be treated for latent TB with appropriate medication. However, students in the following groups are at increased risk of progression from LTBI to TB disease and should be prioritized to begin treatment as soon as possible.

- Infected with HIV
- Recently infected with *M. tuberculosis* (within the past 2 years)
- History of untreated or inadequately treated TB disease, including persons with fibrotic changes on chest radiograph consistent with prior TB disease
- Receiving immunosuppressive therapy such as tumor necrosis factor-alpha (TNF) antagonists, systemic corticosteroids equivalent to/greater than 15 mg of prednisone per day, or immunosuppressive drug therapy following organ transplantation
- Diagnosed with silicosis, diabetes mellitus, chronic renal failure, leukemia, or cancer of the head, neck, or lung
- Have had a gastrectomy or jejunoileal bypass
- Weigh less than 90% of their ideal body weight
- Cigarette smokers and persons who abuse drugs and/or alcohol

*Populations defined locally as having an increased incidence of disease due to *M. tuberculosis*, including medically underserved, low-income populations

_______ Student agrees to receive treatment

_______ Student declines treatment at this time
